Compare provider quality for better decisions

We offer the Compare Hospitals comparison tool on our website, giving you all the information you need to choose quality hospitals in our Health Net networks. Compare Hospitals gives you easy-to-understand details about hospital treatment outcomes for particular illnesses or procedures. Plus, you get access to the national Leapfrog Hospital Survey that provides information about hospital quality and safety. You also get the Leapfrog Hospital Safety Score, which assigns each hospital a letter grade to indicate how safe the hospital is for patients.
